

SAVE MONEY WITH McGraw-Hill ACTIVSim: Online Medical Assisting Simulator

Our NEW! online simulator not only aids students in learning medical assisting skills and patient interaction, it also **eliminates the need for many costly supplies**. Used in conjunction with an experienced teacher, the ACTIVSim program can save career college administrators money. The major bulk of the expense in medical assisting programs are lab fees and supplies. A student can "practice" procedures with ACTIVSim several times, eliminating the need for many costly supplies.

ISBN: 0-07-337419-9

ACTIVSim: Medical Assisting includes a three-part process to improve students' skills:

- **Simulation** allows students to practice procedures and interact with patients followed immediately by
- **Self-assessment** for students to become conscious of where they need to learn more.
- **Debriefing**, the most valuable component of ACTIVSim, provides individualized feedback so students can improve their skills, including communication skills.

Six Patient Case Scenarios include:

- Chest Pain
- Type 2 Diabetes
- Skin Condition
- PAP Smear
- Child with Mother
- Hypertension

Virtual Procedures include:

- Blood pressure
- Biohazardous materials
- Pulse / Respiration
- Spirometry
- Capillary Puncture
- Urinalysis
- Handwashing
- Measure Temperature
- Self Protection
- ECG
- Venipuncture
- Immunology
