

New to McGraw-Hill Higher Education Introduces

# INTERACTIVE e-SOURCE

INTERACTIVE e-SOURCE is an exciting student resource that combines McGraw-Hill print, media, study, and web-based materials into one easy-to-use CD-ROM. This CD-ROM provides cutting-edge technology that accommodates all learning styles, and complements the printed text. The CD provides a truly non-linear experience by using video and art, as well as web-based, and other course materials to help students organize their study materials. Best of all, INTERACTIVE e-SOURCE is free for students who purchase new copies of select McGraw-Hill titles.

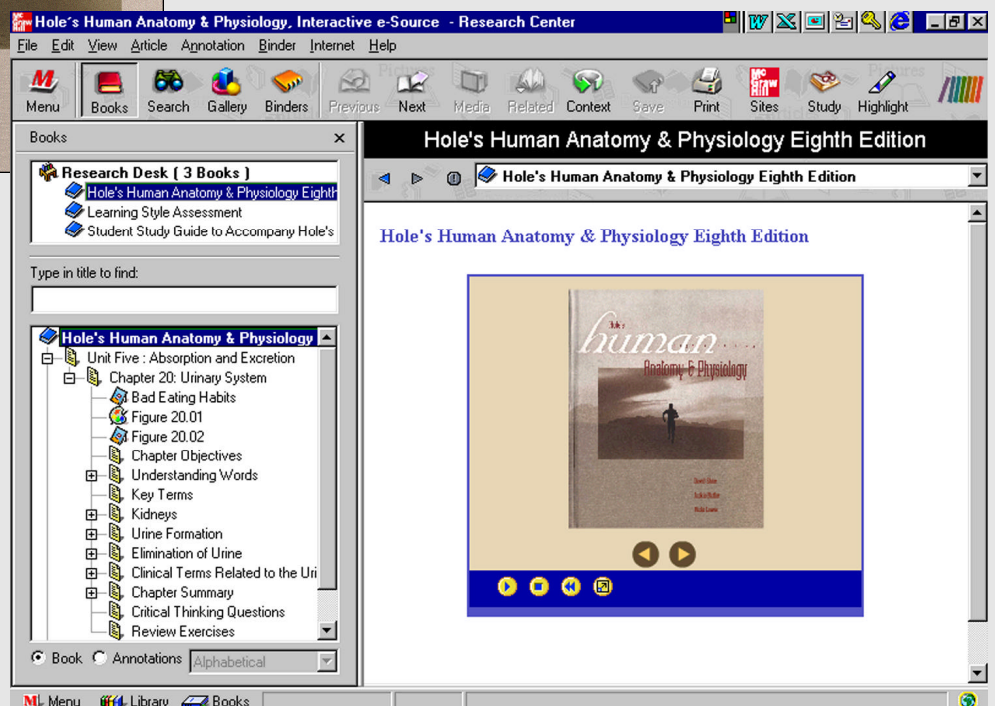

The following features illustrate, in depth, the benefits of INTERACTIVE e-SOURCE.

- Full textbook and study guide HTML files are **interlinked**. This includes all narrative, art and photos, PLUS expertly crafted animations and video.
- Targeted web links encourage **focused web research**.
- A **powerful Search Engine** enables students to improve studying by locating targeted content quickly and easily.
- An **annotation function** allows students to enhance their studying by personalizing e-SOURCE material with their own specific notes or comments.
- By using the **highlighting function** (and their choice of highlight color), students can quickly identify important concepts as they review their materials.
- The **Media Gallery** organizes all non-text content on the CD and presents it as a clear menu. This allows students to perform non-linear searches as well as retrieval of any media content relevant to their specific studying needs.
- A **Customized Binder** function allows students to extract important information and customize their materials for future reference.
- A special **Read** feature converts written text to audio, enabling students to listen to important concepts and hear the proper pronunciations of key terms.
