Preface	xiii
---------	------

New Features in the Second Edition xiv

Major Features xv

Supplement Materials xxiv

Book Organization xxv

Acknowledgments xxvii

Introduction to Computers and Programming Languages 1

0.1 A History of Computers 2

0.2 Computer Architecture 5

0.3 Programming Languages 11

0.4 Java 13

0.5 Exercises 14

Introduction to Object-Oriented Programming and Software Development 15

1.1 Classes and Objects 16

1.2 Messages and Methods 18

1.3 Class and Instance Data Values 23

1.4 Inheritance 26

1.5 Software Engineering and Software Life Cycle 29

1.6 Having Fun with Java 31

1.7 Exercises 34

2**Java Programming Basics 37**

- 2.1 The First Java Application 38
- 2.2 Program Components 48
- 2.3 Edit–Compile–Run Cycle 59
- 2.4 The `javabook` Package 61
- 2.5 Sample Program: Displaying Messages 62
- 2.6 The First Java Applet 66
- 2.7 Exercises 77

3**Numerical Data 83**

- 3.1 Variables 84
- 3.2 Arithmetic Expressions 92
- 3.3 Constants 98
- 3.4 The `Math` Class 100
- 3.5 `InputBox` 103
- 3.6 `OutputBox` 106
- 3.7 Sample Program: Loan Calculator 113
- 3.8 Numerical Representation (Optional) 124
- 3.9 Exercises 128

4**Defining Instantiable Classes 139**

- 4.1 Defining Instantiable Classes 140
- 4.2 Instantiable Classes and Constructors 152
- 4.3 Visibility Modifiers: `public` and `private` 157
- 4.4 Local Variables, Return Values, and Parameter Passing 162
- 4.5 Loan Calculator Program with an Instantiable Class 167
- 4.6 Exercises 181

5**Processing Input with Applets 191**

- 5.1 Placing GUI Objects on Applets 192
- 5.2 Adding `ActionListener` to an Event Source 199

- 5.3 Absolute Positioning of GUI Objects 206
- 5.4 The `Button` Class 208
- 5.5 Converting Text to a Numerical Value 210
- 5.6 Sample Program: Finding Body Mass Index (BMI) 213
- 5.7 Running an Applet as an Application 223
- 5.8 Exercises 224

6

Selection Statements 229

- 6.1 The `if` Statement 230
- 6.2 Boolean Expressions and Variables 238
- 6.3 Nested-`if` Statements 242
- 6.4 `ListBox` 249
- 6.5 The `switch` Statement 252
- 6.6 Sample Program: Drawing Shapes 258
- 6.7 Exercises 280

7

Repetition Statements 289

- 7.1 The `while` Statement 290
- 7.2 Pitfalls in Writing Repetition Statements 294
- 7.3 The `do-while` Statement 299
- 7.4 `ResponseBox` 303
- 7.5 The `for` Statement 308
- 7.6 Nested-`for` Statements 312
- 7.7 The `Format` Class 316
- 7.8 Loan Tables 322
- 7.9 Sample Program: Hi-Lo Game 325
- 7.10 Recursive Methods (Optional) 338
- 7.11 Exercises 343

8

Characters and Strings 355

- 8.1 Characters 356
- 8.2 Strings 359
- 8.3 Primitive versus Reference Types 370
- 8.4 **StringBuffer** 379
- 8.5 Passing Objects as Parameters 384
- 8.6 Returning an Object from Methods 389
- 8.7 Sample Program: Word Play 392
- 8.8 Exercises 404

9

Arrays 411

- 9.1 Array Basics 412
- 9.2 Arrays of Objects 421
- 9.3 Passing Arrays to Methods 431
- 9.4 **MultilnputBox** 436
- 9.5 Self-Referencing Pointer 439
- 9.6 Sample Development: The Address Book 446
- 9.7 Two-Dimensional Arrays 463
- 9.8 Vectors 470
- 9.9 Exercises 476

10

Sorting and Searching 481

- 10.1 Searching 482
- 10.2 Sorting 488
- 10.3 Heapsort 495
- 10.4 Sample Program: Sorting an **AddressBook** 509
- 10.5 Exercises 515

11

File Input and Output 519

- 11.1 File and **FileDialog** Objects 520
- 11.2 Low-Level File I/O 525

- 11.3 High-Level File I/O 532
- 11.4 Handling Exceptions 539
- 11.5 Object I/O 544
- 11.6 Sample Class: Saving an AddressBook Object 548
- 11.7 Exercises 556

12

Reusable Classes and Packages 559

- 12.1 Object Categories 560
- 12.2 Method Overriding and Overloaded Methods 562
- 12.3 Sample Classes: Reusable EgggyPeggy and HiLo 569
- 12.4 Package Organization 595
- 12.5 Exercises 597

13

GUI Objects and Event-Driven Programming 603

- 13.1 Placing Buttons on a Frame 605
- 13.2 Handling Events 611
- 13.3 Placing TextField Objects on a Frame 618
- 13.4 Menus 620
- 13.5 Handling Mouse Events 626
- 13.6 Other GUI Objects 634
- 13.7 Sample Program: A Simple Calculator 639
- 13.8 Exercises 652

14

Inheritance and Polymorphism 657

- 14.1 Defining Classes with Inheritance 658
- 14.2 Using Classes Effectively with Polymorphism 662
- 14.3 Inheritance and Member Accessibility 666
- 14.4 Inheritance and Constructors 672
- 14.5 Abstract Superclasses and Abstract Methods 676
- 14.6 When and When Not to Use Inheritance 682
- 14.7 Sample Program: Computing Course Grades 684

14.8 Exercises 704

15

Class Roster Maintenance Program 709

- 15.1 Method Call Sequence Diagram 710
- 15.2 Problem Statement 711
- 15.3 Overall Planning 712
- 15.4 Step 1 Development: Program Shell with Menus 716
- 15.5 Step 2 Development: Create a New Roster 722
- 15.6 Step 3 Development: Add Students 729
- 15.7 Step 4 Development: Delete Students 737
- 15.8 Step 5 Development: Edit Student Names 740
- 15.9 Step 6 Development: Edit Test Scores and Compute Grades 746
- 15.10 Step 7 Development: Display Student Information 753
- 15.11 Step 8 Development: Storing Grade Roster 765
- 15.12 Step 9 Development: Finalize and Improve 775
- 15.13 The `StudentNameDialog` Class 776
- 15.14 The `TestScoreDialog` Class 786
- 15.15 Exercises 791

16

Recursive Algorithms 797

- 16.1 Basic Elements of Recursion 798
- 16.2 Directory Listing 799
- 16.3 Anagram 801
- 16.4 Towers of Hanoi 805
- 16.5 Quicksort 809
- 16.6 When Not to Use Recursion 815
- 16.7 Exercises 817

A

The `javabook` Package 819
