x- and y-Intercepts of a Line Given the Equation in Standard Form

• Example 1

Find the x - and y -intercepts of the line given by $-x + 2y = 10$
We find the x -intercept of the line by setting $y = 0$ and solving for x .

$$\begin{aligned} -x + 2 \cdot 0 &= 10 \\ x &= -10 \end{aligned}$$

The x -intercept is -10 .

Now we find the y -intercept by setting $x = 0$ and solving for y .

$$\begin{aligned} -0 + 2y &= 10 \\ 2y &= 10 \\ y &= 5 \end{aligned}$$

The y -intercept is 5 .
