

Domain of a Real Function

• Example 1

Graph the domain of the function

$$f(x) = \sqrt{-x + 3}$$

on the real number line.

$f(x)$ is defined for any real number x such that

$$-x + 3 \geq 0$$

$$\text{or } x \leq 3$$

The domain of f is thus the set of all the real numbers less than or equal to 3.

The graph is given below.
